EDUCATION

Anil Neerukonda Institute of Technology and Sciences (ANITS)

Bachelor Of Technology, CSE-data science

November 2023 - Present

CGPA - 8.64

Sri Chaitanya Junior College, Visakhapatnam

June 2021 - May 2023

BIEAP-MPC

Score: 931/1000

SKILLS AND PROFICIENCIES

Languages: python (Primary), C

Frontend / Backend: React, HTML, CSS, JavaScript

Infra & Tools: Docker, Docker Compose, REST APIs, Microservices, Git/GitHub, Insomnia

Databases: MongoDB, MySQL - Indexing, Normalization

CS Fundamentals: DSA, OS, CN, DBMS, OOPs, Collections, Multithreading.

Interests: System Design, Cloud Computing (AWS), Machine Learning.

WORK EXPERIENCE

ELEVATE LABS Pvt Ltd

Dec 2025 - April 2026

Trainee

- Completed three months of intensive python developer training covering backend, database integration, and deployment workflows.
- Developed responsive and functional applications by implementing user interfaces, server-side logic, and database connectivity.
- Deployed and managed applications while applying version control, debugging, and end-to-end development practices.

PROJECTS

Credit card fraud detection system | Python, Scikit-learn, XGBoost, Pandas, NumPy

2026

- Engineered an end-to-end machine learning pipeline leveraging XGBoost and Random Forest algorithms to identify fraudulent credit card transactions with a 94.5% precision rate.
- Implemented SMOTE (Synthetic Minority Over-sampling Technique) to handle highly imbalanced datasets, effectively mitigating bias and reducing false-positive transaction flags by 35%.

Fake News Detector | Python, NLP, Scikit-learn, Flask, NLTK, Streamlit

2026

- Developed a Natural Language Processing (NLP) model to classify malicious misinformation and fake news, achieving an F1-score of 91.2% across 5,000+ text articles.
- Utilized TF-IDF Vectorization and Passive-Aggressive Classifiers to analyze textual context and extract linguistic patterns in real-time.
- Created a user friendly interface using Streamlit framework.

Expense Tracker | Python, Pandas, NumPy, Matplotlib, Seaborn

2026

- Developed a Python-driven financial data analytics pipeline to parse, clean, and categorize raw user transactional data across multiple spending streams.
- Conducted comprehensive Exploratory Data Analysis (EDA) utilizing Pandas and NumPy to identify seasonal spending anomalies, reducing irregular expenditure tracking errors by 25%.
- Engineered dynamic data visualization dashboards using Matplotlib and Seaborn to map monthly budgetary trends, transaction distributions, and category-wise cost breakdowns.

ACHIEVEMENTS

- * Participated in **HackAPTS** organized by **GeekforGeeks**
- * Selected in college level **SIH**(Skill INDIA Hackthon) in software category.
- * Participated in **TechNova** Hackthon.

CERTIFICATIONS

- **NPTEL:** Business Intelligence & Analytics
- **Python:** Certified by Elevate labs
- **Deloitte:** Data Analytics
- **Cisco:** Computer Networking Essentials
